1. This Office action is in response to the application filed February 8, 2006. This application claims the benefit of PCT application US04/25897, filed August 10, 2004 which claims the benefit of provisional application 60/497,973, filed August 25, 2003. Claims 1-11 are pending.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Rogers (6,794,992).

Regarding claim 1, Figure 2 shows the claimed remote control with a plurality of keypads arranged in groupings based on functionality. It is clear that the shape and location of the keypads and groupings enable the user to operate the universal remote control.

Art Unit: 2612

Regarding claim 2, Figure 2 shows at least groupings for volume/channel keys and a grouping for number keys.

Regarding claim 3, see spacing between numbers keys and volume keys.

Regarding claims 4 and 5, see shape of number keys and volume keys.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 6-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rogers (6,794,992).

Regarding claim 6, this claims is essentially the same as claim 1 with the inclusion of at least one remotely controllable appliance. While, Rogers does not show the remotely controlled appliance, it would have been obvious to include such an item in a system since that is the purpose of the remote control unit. The items are designed to have utility when used together.

Regarding claims 7-10, these limitations have been addressed in prior claims.

Regarding claim 11, see item 23 in Figure 2.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Albert K. Wong whose telephone number is 571-272-3057. The examiner can normally be reached on M-Th.
